

MOHAMED AL NADY

Junior Data Analyst

Cairo, Egypt · +20 100 570 5460 · mohamednady0@outlook.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building end-to-end analytics solutions — SQL data warehouses, ETL pipelines, data modeling, and Power BI dashboards. Combines strong SQL and data visualization skills with 4 years of cross-functional stakeholder experience in a data rich business environment, where insights directly informed strategic decisions. Proven ability to translate complex datasets into clear, actionable recommendations for non-technical audiences. Detail-oriented, self-driven, and passionate about leveraging data to drive business performance.

TECHNICAL SKILLS

Data Analysis & Querying: SQL, T-SQL, Advanced Queries, Query Optimization, Window Functions (LAG, RANK, ROW_NUMBER), CTEs, Subqueries, Excel, Power Query, EDA, Statistical Analysis, Trend Identification

Data Visualization & BI: Power BI, DAX, KPI Design, Interactive Dashboards, Data Storytelling

Data Engineering & Modeling: ETL Pipeline Design, Star Schema, Fact & Dimension Tables, Data Warehouse Design, Medallion Architecture

Tools & Platforms: SQL Server (SSMS), Power BI Desktop, Microsoft Excel, Power Pivot, GitHub

Currently Learning: Python (Pandas, NumPy), Azure Fundamentals

PROJECTS

Telecom Customer Churn & Revenue Loss Dashboard

Power BI · DAX · Data Modeling

- Built an executive Power BI dashboard analyzing subscriber churn and \$2.86M in revenue loss across 7,043 accounts, delivering actionable retention insights to cross-functional stakeholders.
- Identified key churn drivers using advanced DAX measures: month-to-month contracts (42.7% churn, \$1.93M lost) and 0–12 month tenure cohorts (47.4% churn).
- Quantified bundling impact — 4+ add-ons reduced churn from 50.3% to 5.3%, providing a clear, data-backed retention recommendation. Designed pop-out slicers for self-service reporting.

SQL Data Warehouse — End-to-End ETL & Data Modeling

SQL Server · T-SQL · Star Schema

- Architected a full SQL data warehouse using star schema — designed fact and dimension tables optimized for BI consumption and built complete ETL pipelines ensuring data integrity.
- Performed advanced trend analysis using window functions (LAG, running averages, cumulative totals) and built reusable reporting views to standardize KPI calculations across business units.

Advanced Exploratory Data Analysis & Business Reporting

SQL Server · T-SQL · Statistical Analysis

- Conducted structured EDA using complex SQL queries to identify numerical trends, outliers, and data quality issues; delivered actionable business reports for non-technical stakeholders.

IBM HR Analytics Dashboard

Power BI · DAX · Data Storytelling

- Designed a 4-page interactive Power BI dashboard analyzing employee attrition drivers across 1,470 records and 35 attributes; surfaced statistically significant factors (overtime, tenure, job role) as a clear data narrative for HR leadership.

Executive Sales Performance Dashboards

Excel · Power Pivot · Power Query · DAX

- Delivered two executive dashboards: one tracking \$14.54M revenue across 28.7K units (pivot tables, slicers, trend charts) and one modeling \$126.29M profit at 41.1% margin using Power Query star-schema prep.

PROFESSIONAL EXPERIENCE

Freelance Real Estate Analyst & Agent | [Self-Employed](#) — Cairo, Egypt

2025 – 2026

- Analyzed property price and market data across Cairo districts, producing structured advisory reports — mirroring the ad-hoc analysis and stakeholder reporting cadence of a BI analyst role.
- Built Excel KPI dashboards tracking conversion rates, pipeline status, revenue targets, and transaction activity, providing data-informed performance summaries for monthly reviews.

Real Estate Agent — Resale Department | [Smart Step](#) — Cairo, Egypt

2023 – 2025

- Maintained and analyzed 200+ property listings in Excel — tracked pricing trends, availability, and sales velocity to identify high-demand areas; delivered weekly KPI reports to management.
- Built Excel-based performance reports covering sales conversion rates, revenue targets, and active inventory, enabling data-driven decisions on pricing and inventory prioritization.

Real Estate Agent — Primary Sales | [MLS](#) — Cairo, Egypt

2022 – 2023

- Tracked client pipeline activity, pricing benchmarks, and weekly sales performance in Excel; prepared structured weekly summaries of pipeline status, conversion rates, and revenue targets.

EDUCATION

Bachelor of Commerce | [Helwan University](#) — Cairo, Egypt

2018 – 2022
